

简介 General Description

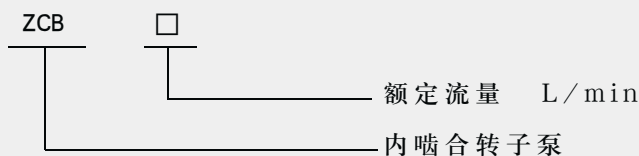

本油泵是一种新设计的圆弧内啮合、连柄、偏心盲孔泵体的优质转子泵，具有结构紧凑、强度好、噪音低、外形美观、油液无渗漏等特点。广泛应用于减速机行业的润滑，也适用于微型机床、机械设备在1.6MPa以下液压系统的润滑及动力源使用。

This pump is a well-designed product, which has inner meshing rotor, connecting handle, offset and blind-hole pump body. so it possesses the superiorities of compactness, reliability, lower noise, most eyes-comfort

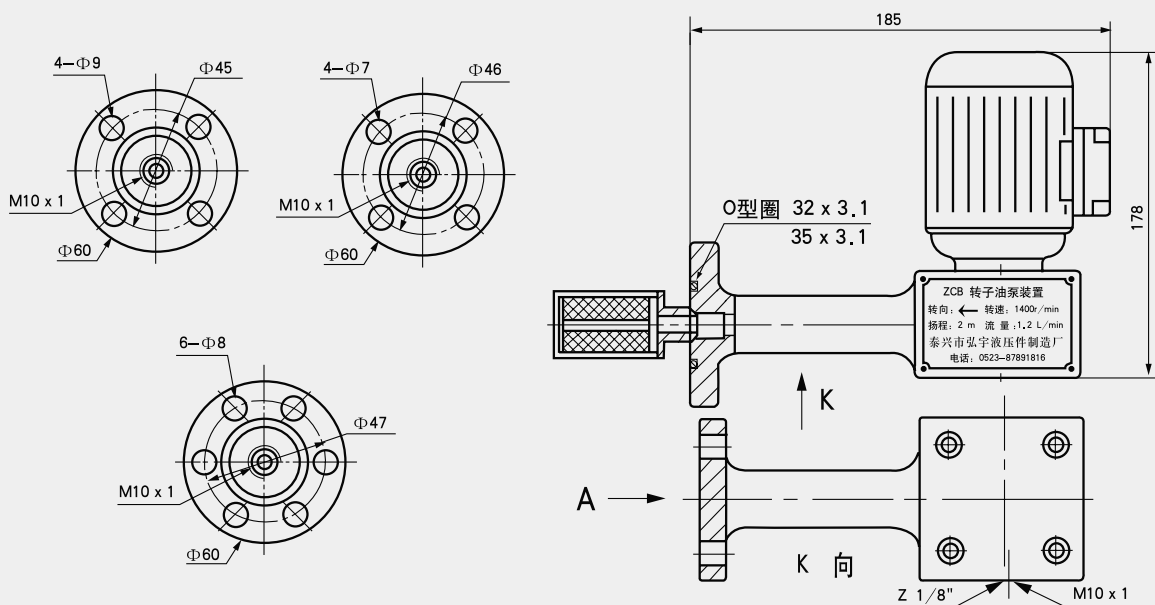

appearance and no oil leakage. this pump is in the wide applications of the lubrication such as decelerating equipments, tool machine and also be the power unit of hydraulic system which pressure ranging from 0 to 1.6 MPa.
